GET DIGITALLY READY!

Ministry of Communications and Information

SG:D | GET READY!
Look for the symbols below to find the resources you need.

CHILD
ADULT
SENIOR
Digital technology is becoming part of our everyday lives. This has brought about many benefits and conveniences, including online shopping and entertainment, greater ease in navigation, new ways of learning, and deeper connections with family and friends.

Not only can technology make our daily lives more convenient, it can also strengthen our community bonds by helping us to connect to one another more easily, and look out for one another.

It is important that every Singaporean is able to seize the opportunities provided by technology. **This is why we have put together this information booklet containing useful information on various government resources and initiatives to help you and your loved ones embark on your digital journeys.**
Interested to learn about technology but have no access to a mobile device or the internet? Check out the initiatives in the next few pages to find out more about the government schemes we have to help you get connected!

I don’t have a computer. How can I get connected?
Assistive Technology Fund

The Assistive Technology Fund provides subsidies for persons with disabilities to purchase assistive technology devices to enable independent living.

Applicants can approach their social workers or therapists from touchpoints such as hospitals or Voluntary Welfare Organisations for assessment and assistance on suitable devices.

Successful applicants qualify for a subsidy of up to 90% of the cost of the required equipment, subject to a lifetime cap of $40,000.

WHO IS ELIGIBLE

Singapore Citizens OR Permanent Residents

- Certified to have a permanent disability
- Have undergone qualified assessor’s assessment to determine need and type of device(s)
- Household gross monthly income per person 
  $1,800

GET INFORMED!

After you get connected, you have opened the door to many possibilities to enhance your life through technology. The following resources can help you learn how to use technology securely and with confidence.
The Basic Digital Skills Curriculum equips individuals with basic digital skills so that they can use their mobile devices for greater social connectivity and convenience. These skills align with common everyday activities such as searching for information online, communicating through emails or chats, making transactions or e-payments online, and accessing digital government services. The curriculum also includes other messages on cybersecurity and discernment, to help raise awareness on staying safe in a digital world.

Those interested to pick up the basic digital skills can check out the one-day SkillsFuture for Digital Community training which is offered at selected Silver Infocomm Junctions.

Digital Clinics

At Digital Clinics, volunteers provide one-on-one assistance to individuals in using their mobile devices. At these clinics, participants can find out how to connect to hotspots, personalise accessibility tools on their devices, and adjust their phone settings and functions to best suit their needs. Participants can also find out more about applications and transactions relevant to their lifestyles such as mobile payments.

North East Eldersurf Intergen Bootcamp

The North East Eldersurf Intergen Bootcamp by North East Community Development Council and IMDA aims to educate seniors on basic mobile device skills such as connecting to Wi-Fi, taking photos, messaging, and creating an Apple ID or Google account. Seniors will be divided into two classes — iOS and Android classes — to learn effectively. There is also an inter-generation bonding element, where students or youths will be paired up with the seniors to guide them during the workshop.

WHO IS ELIGIBLE

Individuals aged **40 years and above**
Residing in **North East district**

The S.U.R.E. campaign is an initiative by the National Library Board to promote the importance of information searching and discernment.

While information literacy is not a new concern, it has become especially relevant in this digital era where the internet and social media floods us with a lot of content created by anyone.

S.U.R.E. distils key information literacy concepts into four simple aspects:

i. **Source**: Look at its origins. Is it trustworthy?
ii. **Understand**: Know what you’re reading. Search for clarity.
iii. **Research**: Dig deeper. Go beyond the initial source.
iv. **Evaluate**: Find the balance. Exercise fair judgement.

Technology can help us in many different ways! Did you know that there are many programmes today that let you try your hand at creating fun and useful items with technology, even if you are a complete newbie? Find out more in the next few pages!
The Code for Fun Enrichment Programme is offered to all primary and secondary schools to increase students’ exposure to coding and computational thinking. The programme includes academic learning of related concepts using programming language, such as Scratch, and combines this with robotic kits such as Lego WeDo, MoWay, and microcontrollers such as Arduino and Raspberry Pi, to create an engaging coding experience for the student.

6377 3800
Digital Maker Programme

This programme aims to nurture a new generation of digital natives with a passion to create with technology by introducing a simple-to-use microcontroller called the “micro:bit”. The programme provides interested primary and secondary schools with workshops for educators and micro:bits to incorporate digital making into their lessons and school programmes.

For members of the public, introductory workshops are held at community locations for them to learn how to create simple projects with technology. The community locations include community clubs/centres like Tanjong Pagar Community Club, PIXEL Labs@NLB, and various IMDA technology outreach events.

Building digital readiness is a continuous effort. While the Government already has many existing programmes to help you get connected and learn about technology in a fun way, we are continuously enhancing our initiatives and exploring new ways to help everyone enjoy the benefits brought about by technology.

Last year, the Ministry of Communications and Information convened a Digital Readiness Workgroup comprising public, private, and people sector partners to think about what else we can do to help all Singaporeans embrace technology. Some of the recommendations include improving digital access and providing more forms of one-on-one assistance in using mobile devices and digital services. If you are keen to find out more, you can read the full Digital Readiness Blueprint at our website below.

We would greatly welcome your suggestions and ideas! Please feel free to share your thoughts with us through the website above. We are still in the midst of exploring some of these recommendations, and we welcome you to contribute to this effort.
Digital readiness is a national effort. We want to help everyone participate in this digital future together, not just to learn but to empower everyone to do more good for our families, communities, and our nation.

No effort is too small or too simple, and everyone can play a role in this journey. If you have the passion to help others go digital, or know of someone who does, WE WANT YOU!
Here are some government programmes you can volunteer with.
